

Meet all EN, Dibt, Floorscore and ASTM standards

The materials used in the manufacture of Finfloor **Symphony EVP** (Engineered Vinyl Panels) are environmentally friendly and 100 % recyclable. They do not harm people or the environment because they contain no radioactive elements or formaldehyde as they meet all EN, DIBt, Floorscore & ASTM standards for VOC emissions

The UV coating is environmentally friendly, the 100% pvc wear layer is non-toxic and harmless to humans and the environment. The pigment in the colour film is environmentally friendly and the plasticizer used (DOTP) meets all EN, FloorScore, DBIt & ASTM standards for not harming animals and humans. The production technology used is hot pressing and is environmentally friendly as no glues are used. Easy installations with click system uses no glue. Finfloor **Symphony EVP**(Engineered Vinyl Panels) is the safe option for your family and our planet.
